## BURN DRESSINGS THAT IMMEDIATELY COOL THE SKIN AND RELIEVE THE PAIN.

Regardless of your industry, a burn can strike at any time. And that's why it's so important to be prepared. Any burn, even a minor one, can be extremely painful – and dangerous.

In treating a burn emergency, speed and portability are key. So we've designed our patented Water-Jel® Sterile Burn Dressings to be easy to carry, easy to store and easy to use. Consisting of a scientifically formulated cooling gel and medical grade non-woven carrier, when applied to the wound, these burn dressings cool the burn, relieve the pain and protect against airborne contamination. Water based and water soluble,

Water-Jel Sterile Burn Dressings won't stick to the wound and may be applied directly over clothing.

Packed in individual foil pouches, Water-Jel Sterile Burn Dressings are available in different sizes to accommodate a variety of emergency situations. We offer dressings in 2" x 2" (5 x 5cm), 2" x 6" (5 x 15cm), 4" x 4" (10 x 10cm), 4" x 16" (10 x 40cm), 8" x 18" (20 x 46cm) and a 12" x 16" (30.5 x 40.5cm) burn dressing for facial burns with eye, nose and mouth cut-outs.

With Water-Jel Sterile Burn Dressings, it takes no special training to give fast and effective burn care for any type of burn injury.

**WATERJEL**

More care than just burn care

## Cool it

Burn Jel, with the pain-relieving ingredient, lidocaine, draws the heat of a burn away from the skin and dissipates it on contact. Cool Jel has a lidocaine-free formula that cools and soothes minor burns, scalds, cuts and abrasions.

## Cover it

Water-Jel Sterile Burn Dressings, soaked in a water-based, water gel, relieve the pain, cool the burn and protect against airborne contamination. Available in an array of sizes to accommodate all emergency situations.

## Treat it

Our Water-Jel Burn Spray, Antiseptic Spray, Hydrogen Peroxide Spray and Isopropyl Alcohol Spray all come in economical, non-aerosol 2 oz. bottles. An easy fit into most first aid kits or medicine cabinets, they provide a convenient and sanitary way to treat minor emergencies.

## Rescue it

Soaked in water-based, water-soluble gel, our Water-Jel Fire Blankets are used to extinguish flames on victims, rapidly cool and help stabilize skin temperature and prevent burn progression. Available in 3 sizes, our blankets are packaged in wall-mountable canisters or portable foil pouches.
