

The catalogue for chemical burn's treatment

- + **Diphoterine** : is an hypertonic, polyvalent, amphoteric compound developed in France as an eye/skin chemical splash water-based decontamination solution .It decontaminates approximately 600 chemicals, including acids, alkalis, oxidizing and reducing agents, etc.

- + **Hexafluorine** : is a washing solution specific for eye and skin splash due to hydrofluoric acid(HF) developed by PREVOR.
 The in vitro and in vivo experiments show the efficacy of Hexafluorine for the decontamination of HF splashes, in compairison to the washing with water only or the application of calcium aluconate.

50ml cup Diphoterine	Diphoterine spray	Diphoterine / Hexafluorine poach
Item : LIS Volumne : 50ml Application : The eye	Item / volume MICRO/ 100ml MINI / 200ml Application : Face Arms & Legs.	Item : LDP Diphoterine Item : LHP Hexafluorine Volume : 500ml Application : The eye Face Arms & Legs
		
Diphoterine / Hexafluorine Shower	Diphoterine Mural Washing Solution	Hexafluorine Mural Washing Solution
Item : DAPD Diphoterine Item : DAPH Hexafluorine Volume : 5L Application : The whole	Item : DGM1 Volume : 500ml Bottle Application : The eyes Face	Item : HGM1 Volume : 500ml Bottle Application : The eyes Face
